

How to disable web security on Chrome

1. Close all the tabs and then right click on Chrome icon and then select “Properties”.

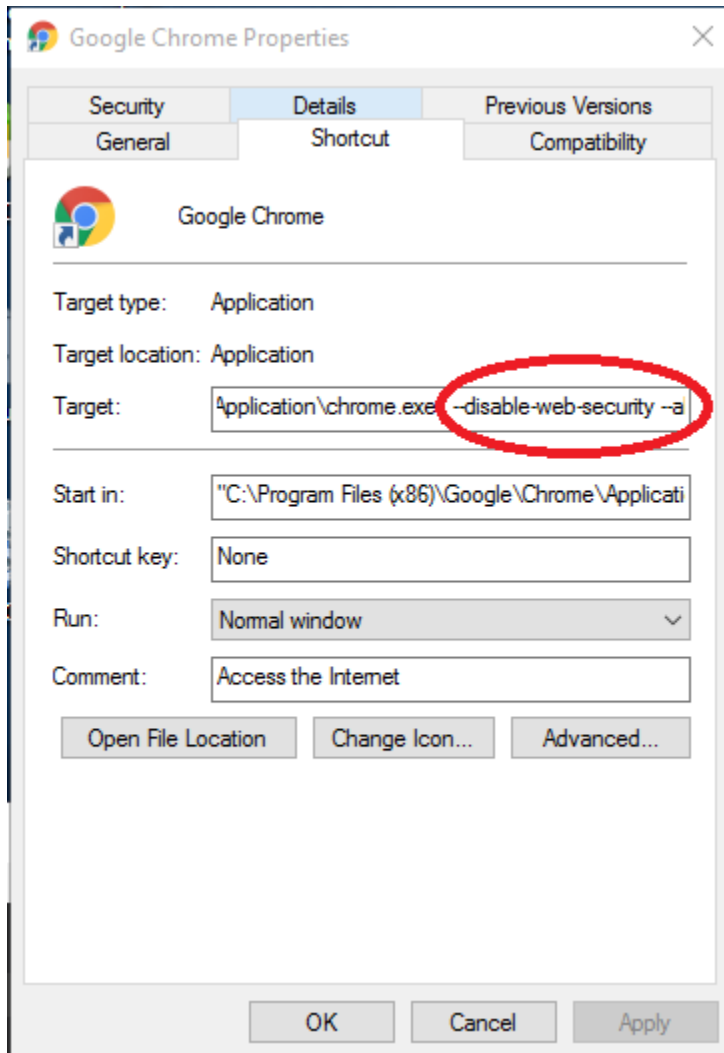

2. Find the input box with label “Target”.

3. Copy "--disable-web-security --allow-file-access-from-files" then paste it at the end of Chrome path.

```
"C:\Program Files (x86)\Google\Chrome\Application\chrome.exe" --disable-web-security --allow-file-access-from-files
```

4. Click on "Apply" to save the changes and launch Chrome again.
